

CO₂GeoNet Open Forum

San Servolo Island, Venice, 6-9 May 2019

Act now for zero emissions

The role for CO₂ capture, utilisation and storage

6 May Pre Open Forum: evening icebreaker reception

Other side events in preparation

7 May
Open Forum day 1

Four years after the Paris Agreement
Update on trends and achievements towards climate goals

Plug & Play Storage:
how close are we?
Providing a transport & storage service

Leading-edge trends in CCUS
Utilisation & storage for long-term emission reduction & removal of CO₂

8 May
Open Forum day 2

Communication:
putting people at the centre
Engaging with and creating benefits for the community

Integrating CCS
Fitting CCS into our low- carbon society

9 May
Post Open Forum

Event 1:
National networking: driving CCS forward
Organiser - CO₂GeoNet & ENOS

Event 2:
Under preparation

About

CO₂GeoNet is the European scientific body on CO₂ geological storage, bringing together 29 research institutes from 21 European countries. The event, now in its 14th year, offers a unique opportunity to meet and interact directly with Europe's largest group of researchers on CO₂ geological storage, attracting a wide range of stakeholders, including representatives from the EC, industry, regulators, public authorities, NGOs, and the research community.
