

CO₂GeoNet Open Forum

San Servolo Island, Venice, 14 - 17 September 2020

Upscaling CO₂ storage to tackle the climate emergency

Note the new dates!
(event to be confirmed in May)

© R.Stead, CO₂GeoNet

○ 2-day Open Forum

Sessions

- 1: CCS is essential, not an option: meeting climate targets with CCS
- 2: National strategies towards CC(U)S: perspectives from Europe
- 3: Key results of the ENabling Onshore Storage in Europe (ENOS) project
- 4: Success stories from around the world: rolling out CC(U)S
- 5: Emerging CCUS technologies: adding value through utilisation

○ Pre- and post- Open Forum Workshops

Expert workshops on technical aspects around CCS deployment will be held before and after the Open Forum

Save the dates! More details available soon from www.co2geonet.com

About CO₂GeoNet is the European scientific body on CO₂ geological storage, bringing together 28 research institutes from 20 European countries. The event offers a unique opportunity to meet and interact directly with Europe's largest group of researchers on CO₂ geological storage.
